linkedin.com/in/adam--yassine | adamyassine.ca Associate Product Manager who owned Carfax's first agentic AI product from 0 to 1 with S&P Global Mobility; Product Owner who grew marketplace host inventory 45%. Background in LLM evaluation, analytics, and fraud detection. EDUCATION Bachelor of Science, Specialization in Computer Science Expected April 2027 Western University, London, ON EXPERIENCE CARFAX Inc. Associate Product Manager â AI Agents April 2026 â Present â Led Carfax's first agentic AI product from 0 to 1 with S&P Global Mobility across a 20-person cross-functional team, using customer discovery to shape a phased roadmap targeting a rise in dealers actively using Carfax's valuation products from 50% to 80% and 40% longer dealer contract lifetimes. â Built an LLM evaluation framework, an automated test suite of 100+ scenarios that checks AI answer quality after every change, so each launch phase shipped only when quality held up. â Designed a model-routing architecture that sends simple requests to a lightweight model and complex reasoning to a premium one, cutting projected inference costs at scale. â Proposed and prototyped a 3-agent orchestration architecture (vehicle history, market data, and recommendation specialist) using Claude Code, improving response accuracy and reducing hallucination over the prior single-agent design. Data Product Analyst (Co-op) â Data Insights & Governance September 2025 â April 2026 â Built 10+ self-serve Power BI and Tableau dashboards on 35B+ records; a usage dashboard tiering 1,100+ dealer accounts gave the sales team targeted outreach lists for low-usage dealers and set the baseline for company usage OKRs, while adoption analysis lifted engagement 22%. â Ran cohort analysis to find churn patterns, leading to targeted product changes that cut churn 9%, and traced a subscription funnel revenue leak that contributed to a 10% increase in monthly recurring revenue. â Built and validated a fraud-detection business rule by profiling confirmed fraud cases in SQL against 10 years of historical data, increasing flagged-case volume 15% and cutting false positives 14% through iterative threshold back-testing. HIVO Inc. Product Owner (Part-time) December 2025 â March 2026 â Partnered directly with the founder to launch a two-sided coworking marketplace in Toronto and Halifax, redesigning host onboarding to grow host inventory 45% and activation 30%. â Defined MVP requirements and reprioritized the backlog across engineering, design, and business to get the product investor demo ready, supporting a \$250K seed round. â Researched market utilization of generative AI and designed a Generative AI Listing Assistant that cut new-host listing time-to-live by an estimated 40%, enabling non-technical coworking operators to publish market-ready listings in minutes. PROJECTS UMDB (Creative Social Platform) - Software Developer / Growth May 2026 â July 2026 â Relaunched a social platform for emerging artists and creatives on React and Next.js, shipping 4+ features (AI assistant, monetization, community voting) for 5,000+ users and driving a 20% week-over-week increase in new users. IRM Consulting (AI Compliance Platform) - Software Engineer July 2025 â August 2025 â Built an AI compliance agent on a secure multi-tenant Supabase backend (OpenAI API, React, Node.js, TypeScript) that generates personalized ISO 27001, ISO 42001, and SOC 1/2 documentation, cutting report creation from weeks to minutes for 50+ clients; now in client pilots. SKILLS â Product & Strategy: Product Strategy, Market & Customer Research, User Interviews, Go-to-Market, Agile, MVP Scoping â AI/ML & Agents: Agentic Systems, Multi-Agent Orchestration, LLM Evaluation (LangSmith), Prompt Design, RAG â Analytics & Data: SQL, Python, Power BI, Tableau, Snowflake, Azure Synapse, Statistical Analysis â Tools: Jira, Confluence, Figma, Excel, Google Analytics, Playwright, Claude Code, Cursor, Obsidian, N8N
